

Unit II. Population and Migration

Population Pyramid Analysis Sheet

Find and print pyramids for each country for the most recent data **and** the projection for 2050. Review the Population Reference Bureau (PRB) for each country. Answer the following based upon the most recent data available, unless otherwise indicated. **Use one side for each country.**

	Country:_____ 2010+		Country:_____ 2050	
1.				
1. Describe the general shape of the pyramid				
2. Is the population rapidly growing, slowly growing, or declining?				
3. Is the population young, balanced, or old?				
4. Does the sex ratio appear natural?				
5. Are there any big dips or increases that seem abnormal? If so, what are they? What might account for these? (disease, famine, war, national population policies, etc.)				
6. Where would you place this country on the Demographic Transition Model?				
7. Why do you think your country is in the stage you identified above? (Justify your answer)				
8. What changes are suggested between current and the 2050 prediction?				
9. Overall does this country seem to be in a good situation or bad situation to experience a Demographic Dividend? Explain.				
10. Use PRB data to find: Rate of Natural Increase & Doubling Time,	RNI	Doubling time	RNI	Doubling time

Unit II. Population and Migration

Population Pyramid Analysis Sheet

Find and print pyramids for each country for the most recent data **and** the projection for 2050. Review the Population Reference Bureau (PRB) for each country. Answer the following based upon the most recent data available, unless otherwise indicated. **Use one side for each country.**

	Country:_____ 2010+		Country:_____ 2050	
1. Describe the general shape of the pyramid				
2. Is the population rapidly growing, slowly growing, or declining?				
3. Is the population young, balanced, or old?				
4. Does the sex ratio appear natural?				
5. Are there any big dips or increases that seem abnormal? If so, what are they? What might account for these? (disease, famine, war, national population policies, etc.)				
6. Where would you place this country on the Demographic Transition Model?				
7. Why do you think your country is in the stage you identified above? (Justify your answer)				
8. What changes are suggested between current and the 2050 prediction?				
9. Overall does this country seem to be in a good situation or bad situation to experience a Demographic Dividend? Explain.				
10. Use PRB data to find: Crude Birth Rate (CBR) & Crude Death Rate (CDR) Rate of Natural Increase & Doubling Time,	CBR	CDR	CBR	CDR
	RNI	Doubling time	RNI	Doubling time
